## TERMS OF SALE

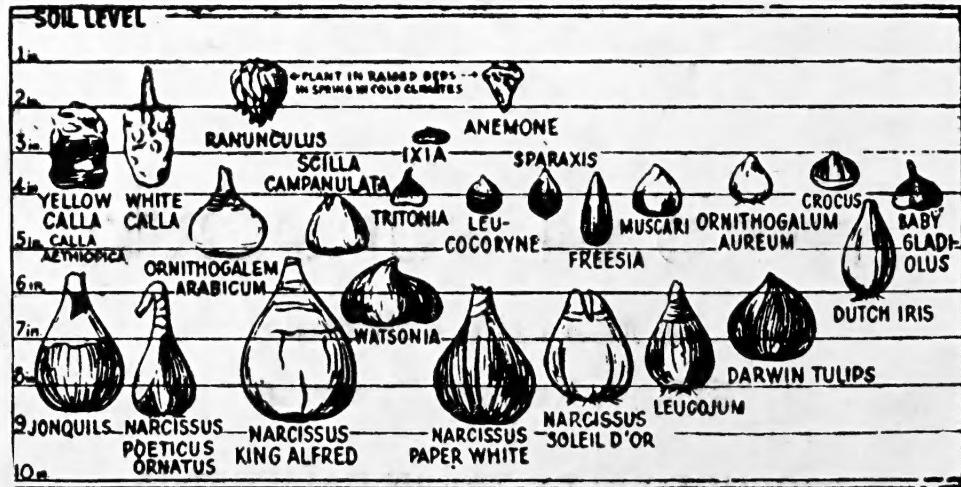

We give no warranty, express or implied, as to the productiveness of any seeds or bulbs we sell and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seeds, bulbs or plants.

All prices quoted are prepaid unless quoted otherwise. Minimum order one dollar.

## FREESIAS

Fragrance is an illusive quality to describe but the Freesia has a perfume that appeals to all. Color or white can be had, the white a bit more fragrant. Easy to grow, sun or semi-shade, plant heavy base down 3 inches deep, space 3 inches apart each way. 100 bulbs will only plant a small plot. Plant from September to January for a long blooming period.

**SEAL OF QUALITY MIXED**—A well-blended assortment. 40c doz.; \$3.00 a 100; or \$25.00 1000. Straight Whites at same price.

Finest of all cut flower bulbs. Very double Camellia type flowers, gorgeous colors. Mixed hybrid types.

## RANUNCULUS

**September to May Delivery**

Culture: Ranunculus are very easily grown. Soak the bulbs in water for a few hours before planting and cover with two inches of soil. In very heavy soils cover with pure sand. The bulbs have finger like projections and these should be planted point's down.

For a good garden display space them from 4 to 6 inches apart. Do not use fresh fertilizers, the soil should be enriched some time before the roots are set out. A liberal supply of water with good drainage is essential.

In the South and California, Ranunculus may be planted in early fall for winter bloom, and from that time on in succession until spring. When planting for late spring and summer blooming place the bulbs where a little shade is available. In the colder sections they must not be planted until all danger from frost is past.

Ranunculus are very attractive grown in pots or boxes in the greenhouse on a sunny location.

### ANEMONES

#### ANEMONES, cousins to the RANUNCULUS

The Anemone is the fitting teammate of the Ranunculus and is planted at the same time. The color scheme is altogether different, as it adds the lacking blue, lavender and purple shades as well as vivid reds and white. The large cushion of black stamen offers a splendid contrast to their rich colors. They have the same superb keeping and cutting qualities as their cousin, the Ranunculus. The "DeCaen" type are single with flowers often 4 inches in diameter.

Delivery September to May

**DeCAEN**—Giant single poppy-flowered type in a rich mixture of blue, purple, red, white, etc., with black cushiony centers for contrast.
